TachoTerminal PRO Configuration

Copy TTConfigurator from the TERMINAL folder to your PC and run TTConfigurator.exe

MESSAGE OR ERROR TYPE	COMMENTS
64. TT PRO PC connection via the recommended USB cable	Do not eject the Flash card.
65. USB storage mode active	Run TTConfigurator and find the device
66. Saving configuration	Select the configuration and press Save Configuration. Wait for 67 signal.
67. Finishing configuration	TT PRO real-time clock updates the date and time.

Reader Firmware Update – Part One

I. Copy 'TachoTerminalPro.inf' Driver from TERMINAL\TTConfigurator\Update folder to an easily accessible location, e.g. desktop.

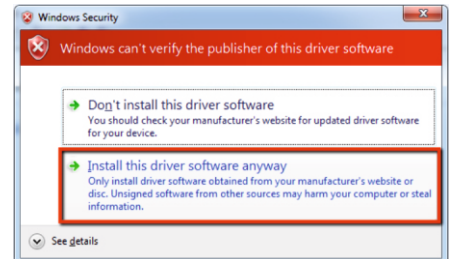

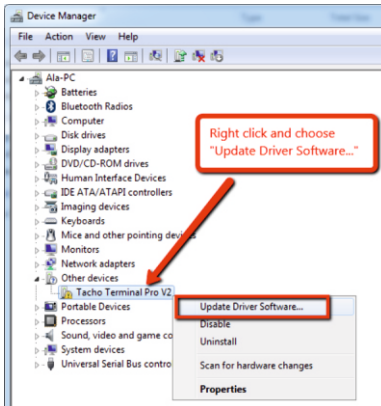

II. Press CONFIG

III. Connect Reader to PC holding CONFIG until Reader is detected by PC (10 sec.)

IV. If Reader Driver is not detected by the operating system, install TachoTerminalPro.inf Driver manually
V. Go to Device Manager (Control Panel/System/Device Manager)

If the driver installation fails, contact the manufacturer.

Reader Firmware Update – Part Two

I. Start LemkeLink software
II. Select TachoTerminal Pro V2

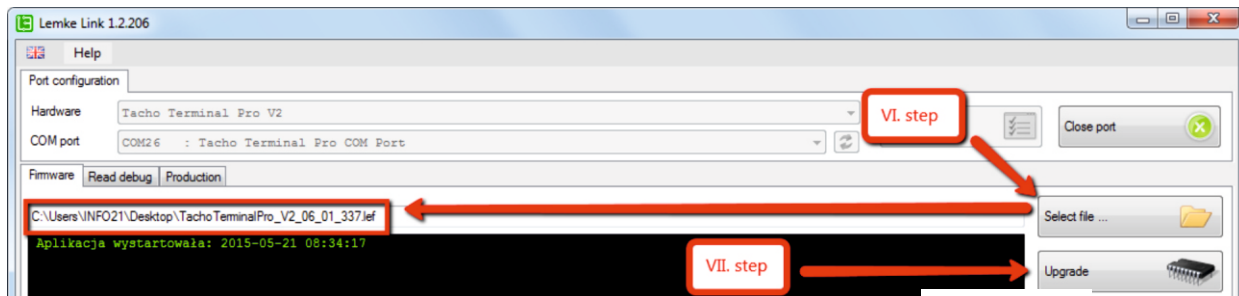

III. Click Refresh Port List

IV. Select TachoTerminal Pro COM Port
V. Click Open Port

VI. Select the firmware update file

VII. Click Upgrade

VIII. Check update status in Bootloader tab

IX. Click Close port

If the installation of the software fails, contact the manufacturer

Reader Firmware Update – Part Three

Common LED and Sound Codes at Reader Firmware Update

CARD				
ALL				
CONFIG				
info				
sound				■
code no.	68	69	70	71

MESSAGE OR ERROR TYPE	COMMENTS
68. Starting update mode	Press CONFIG for 10 sec while connecting the reader to a PC via miniUSB-USB cable.
69. Device ready for update	After 10 seconds release the CONFIG button and run LemkeLink application. Choose TachoTerminal Pro COM port and firmware update file and upload new firmware.
70. Reader firmware update in progress	At firmware update do not disconnect the USB cable or do not press any buttons.
71. Finishing firmware update	Check the update information in Bootloader tab.

**disconnecting the USB cable at firmware update may cause the reader damage or malfunction*

Warranty and terms

The product is covered by a 12-month warranty.

The warranty shall not apply if the failure, defect, or malfunction is due to natural wear or such causes as spilling a liquid, mechanical damage, overvoltage, lightning, etc. The manufacturer shall not be liable for defects caused by unauthorized interference with the product's design.

The MANUFACTURER shall consider and respond to the BUYER's complaint within 14 days. Should this deadline not be observed, the complaint shall be considered to the benefit of the BUYER. The product complained about shall be delivered in a package that protects it against damage.

The cost of transport of such a product shall be borne by the BUYER; if the complaint is accepted, the MANUFACTURER shall reimburse the cost of transport of the product to the BUYER by making a bank transfer to a bank account indicated by the BUYER. If the complaint concerns a larger number of products, they may be delivered in one shipment. The warranty shall be extended by the time of repair of the product complained about.

Shipments at the MANUFACTURER's cost shall not be accepted.

MANUFACTURER:
TACHOLAB Sp. z o.o.

ul. Estetyczna 4
43-100 Tychy
